

# Pharmaceutical Transport in the Best Conditions

# Driving healthcare

We help the manufacturing laboratory, distributor, contract warehouse, and logistics operator, in the network distribution of their pharmaceutical and para-pharmaceutical products.

## LOGISTICS STRUCTURE:

# Specialised services

## Frío Farma

We transport thermo-labile products that require a temperature of between **+2°C and +8°C** such as vaccines, insulin, etc.

## Farma <25°

We guarantee the transport of medicines or other hospital products at ambient temperature, without exceeding **+25°C**

## Farma Plus

We provide solutions between **+15°C and +25°C** for those products that are sensitive to temperatures below **+15°C**

## Ambi Farma

Material and products that do not require temperature control: some medical devices, implants, nutritional catheters, orthopaedic products, equipment for small hospitals, etc.

## Home Delivery

Temperature-controlled shipments to private individuals for B2B customers.
